

Engage in conversations with confidence and ease, even in noisy environments during holiday gatherings. We have the program for you.

The Hearing Solution has information about a new program that uses fun to play games that helps improve your listening ability in noise. Created using a decade of research, cLEAR Auditory Brain Training has proven to be effective.

This holiday season you will not be nodding and pretending that you have heard in a noisy restaurant or party!

As a participant you will receive personalized coaching by Doctor of Audiology, Julia Ahlquist Tanner. Julia firmly believes that hearing aids by themselves are not enough to achieve optimal hearing!

This program is for you if:

- You do not wear hearing aids
- You have a hearing loss and wear hearing aids (hearing aids alone can't always address the full impact of hearing loss)
- Your hearing is normal but you have difficulty hearing in background noise
- You are familiar with your computer or I pad and enjoy playing games
- You are dedicated to lifelong learning and are up for a challenge

Kick off and Informational Meeting: Friday, October 13th. 1:00-2:30 pm.

**The Hearing Solution Inc
650 University Ave, Ste 108
Doctor of Audiology and Practice Owner
Julia Ahlquist Tanner, AuD**

**Space is limited, so please take the time to RSVP by emailing:
